

APPENDIX I

Examples of Eligible Green Project Categories

[Please note that this is not an exhaustive list of Eligible Green Projects]

S/L	Eligible Green Project Category	Notes
1.	Renewable energy	This includes generation Transmission, appliances and products, e.g. solar, wind, geothermal, mini/macro hydro
2.	Energy efficiency	Relates to new and refurbished buildings, energy storage, smart grids, appliances and products
3.	Pollution prevention and control	Includes reduction of pollution in air emissions, greenhouse gas control (reducing carbon sources and increasing sinks), soil remediation, waste reuse, waste reduction, waste recycling and energy/emission-efficient waste to energy
4.	Environmentally sustainable management of living natural resources and land use	Covers environmentally sustainable animal husbandry; climate smart farm inputs such as biological crop protection or drip irrigation; environmentally sustainable fishery and aquaculture; environmentally sustainable forestry, including afforestation or reforestation, and preservation or restoration of natural landscapes, sustainable land management, sustainable wildlife management
5.	Terrestrial and aquatic biodiversity	Includes the protection of wetlands, terrestrial, coastal, and watershed environments
6.	Clean transportation	Examples: electric, hybrid, public, rail, non-motorized, multi-model transportation, infrastructure for clean energy vehicles and reduction of harmful emissions
7.	Sustainable water and wastewater management	Includes sustainable management of water resources, sustainable infrastructure for clean and/or drinking water, wastewater treatment, sustainable rural and urban drainage systems and river training and other forms of flooding mitigations.
8.	Climate change adaptation	Includes information support systems, such as climate risk and early warning systems
9.	Eco-efficient and/or circular economy adapted products, production technologies and processes	Covers development and introduction of environmentally sustainable products, with an eco-label or environmental certification, resource-efficient packaging and distribution
10.	Green buildings	Relates to green building which meet regional, national or internationally recognized standards or certifications. Such as energy use, water use, indoor environmental quality, material selection and the building effects on its site.
